Column G is the Player's Current Avg that will be used

* **Established Bowler** = A bowler that has met the minimum number of games (21) played in a previous season

For established bowlers, their Current Avg will be the Prev Year Final Avg until they have bowled 16 games After that, the average will be re-calculated in all subsequent games played thereafter

For non-established bowlers, their Current Avg will be calculated immediately after their initial 4 games and then be re-calculated in all subsequent games played thereafter The calculation will be as follows:

In Week 1, the average will be the 4 games So if the player bowls a series of 400, then the average is 100

In Week 2, the average will be the 4 games from Week 1 + the 4 games from Week 2 So if the player bowls a series of 800, the average = (400 + 800)/8 games which is now 150 The 150 average will be used to calculate the scores in Week 2

The calculation and average will be applied in the same manner until the player reaches 16 games After 16 games, the new or non-established bowlers will now become established bowlers and follow the same calculations as established bowlers
